## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-6, 9, 11-13, 15, 17, 19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Miranowski (6618978).

As to claim 1, Miranowski discloses a body of cylindrical form; a strainer plate having a plurality of apertures and connecting flanges; and means for controlling pivotal movement (fig. 1).

Art Unit: 3644

As to claim 2, disclosed are the flanges extending outwardly from the outer periphery of the plate and perpendicular to the plate and fastened by an equivalent number of fasteners (fig. 5).

As to claims 3 and 20, disclosed is the plate outer diameter smaller than the body diameter.

As to claim 4, disclosed is a brace connected to a pair of vertical members (fig. 4).

As to claim 5, disclosed is a pivot plate (42) connecting to a controlling means.

As to claim 6, disclosed is a support rod (34) having an end portion in the form of a J extending through an aperture of said pivot plate and an upper end extending above and beyond the top of the body (fig. 4).

As to claims 9 and 11, the method steps of the instant claim are readily apparent during the operation of the device of Miranowski.

As to claim 12, disclosed is a cylindrical body; a strainer plate with a pair of flanges and fastened to the body by an equivalent number of fasteners; a brace and a support rod having a J-shaped hook (fig. 1).

Art Unit: 3644

As to claim 13, disclosed is the horizontal member comprises an aperture.

As to claim 15, disclosed is the strainer plate at the bottom of the body.

As to claim 17, disclosed is the maximum angular position approximately 80 degrees from an axis extending perpendicularly to said body.

As to claim 19, disclosed are top and bottom edges that are not sharp (read as a hem; fig. 2)

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miranowski (6618978).

As to claim 18, disclosed is the device made of metal. Not disclosed is galvanized metal. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the metal of galvanized metal; since it has been held to

Art Unit: 3644

be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

### ***Allowable Subject Matter***

Claims 7, 8, 10, 14 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
